

### **Front back Ornaments instructions.**

Please read before sewing out.

These Ornaments fit the 5x7 hoop

You will need 2 layers of netting and 2 layers of washaway stabilizer.

When embroidery is completed, cut around each ornament close to the edge. If you happen to snip into the pattern, it can be fixed later with a bit of glue as you will be layering these patterns back to back.

Sit the completed patterns in a bowl of warm water to let the wash away stabilizer dissolve.

Lay out to dry or clip on to a fan.

When completely dry lay each matching pattern out face down and spread glue (glue sticks work well) completely covering the back side of one of the patterns. (You can use what ever glue you like)

Then lay the patterns together with the wrong sides together and use some clips to hold them. Let the glue set up well. You can touch up spots that aren't sticking as you go.

When glued together and you are happy with them, they are ready to hang on the tree or in the window.

When storing for next year please lay flat and not where they can get damp.

Please write if you have any questions
