

JHB461 design detail

This is a mini set consisting of a towel topper and two accessory designs which can be stitched on aprons, tablecloths, runners, place mats or where ever you need a funky hen to brighten up your projects.

All the hens has got various appliqué areas with stitch stitch detail here and there. The towel topper is an in the hoop project also with additional appliqué areas. I made two place mats with my accessory designs and the set makes a nice gift for the chicken addicts out there LOL.
